# GENERAL TERMS AND CONDITIONS

**I. SPECIAL ORDERS** A "Special Order" is defined as a product not stocked by EDCO or any product that is custom-made by EDCO to the customer's specifications. These orders are non-returnable, and all sales are final. The customer's signature is required on the order confirmation, and will not be made or ordered until EDCO has received the signed confirmation. Product must be picked up (or delivered) within 30 days of the order being ready at EDCO. Failure to do so will result in a 5% storage fee for every month the product remains in our facility.

**II. DELIVERY - F.O.B. HOPKINS, MN.**

Upon due tender of goods all risk or damage and incidents of ownership pass to the Purchaser but EDCO retains a security interest in the goods until purchase price is paid. Weights shown are approximate.

**III. TAXES**

Prices do not include any state or local sales, use, operational or license taxes or any tax imposed on the use or sale of the material involved.

**IV. RETURNS**

All sales are final. Returned goods will not be accepted without first providing a list of material(s) as well as one of the following: (1) Original invoice, (2) Original order number, (3) Original purchase order number. Once this information has been received, and the requested material return is within the policy outlined below, EDCO will issue a Return Material Authorization (RMA) form. Returns are only valid 90-days after the original purchase date. After the material(s) have been returned, they will be inspected for count accuracy and integrity. If materials or packaging are deemed unsalable, or they were not included on the material list provided, Edco Products, Inc. reserves the right to dispose of this material.

**V. OFFERING**

| Calculate total area as normal, factor in an additional 15% for waste. With excessive Hip and Valley, it may be necessary to increase waste percentage to as much as 17%. If you are calculating a material list from a blueprint, it is necessary to factor the roof pitch. NOTE: Minimum pitch requirement is 4/12.   |              |                        |                    |

| <b>HIP/RIDGE ASSEMBLY:</b> Calculate total linear footage. Add 5%, and divide by 10 for number of pieces. Vented Ridge will require three components: Trimline Venting, Ridge Starter Base and Hip/Ridge Caps. Fasten with 2" Hex Head screws. Non-Vented Ridge/Hips require two components: Starter Base with Foam and Hip/Ridge Caps. Fasten with 1-1/2" Hex Head screws. |              |                        |                    |

| <b>ROLL-OVER:</b> Calculate entire perimeter of roof area, add 5%, and divide by 10 for number of pieces. No Rake starter & J-Channel will be used.  |           |            |  |
| <b>RAKE STARTER &amp; J-CHANNEL:</b> Calculate total linear footage of gable roof edge, add 5% and divide by 10 for number of pieces. Always use equal number of pieces of Rake Starter and J-Channel. (NOTE: This application requires the combination use of Eave Starter, Rake Starter and J-Channel.)  |           |            |  |
| <b>VALLEY ASSEMBLY</b> Calculate the total linear footage of valley and divide by 10 for number of pieces. Consider overlap and overhang in your measurements. Open Valley requires 2 pcs Valley Starter Strip per Valley Flashing. Measure length of valley and divide by 10'. Add enough waste for cuts and laps. Closed Valley requires three components: Valley Flashing, Valley Cap, and Filter Foam. Measure length of valley and divide by 10'. Add enough waste for cuts and laps. |           |            |  |
